

Instalação VPN da FLUP no Windows 10

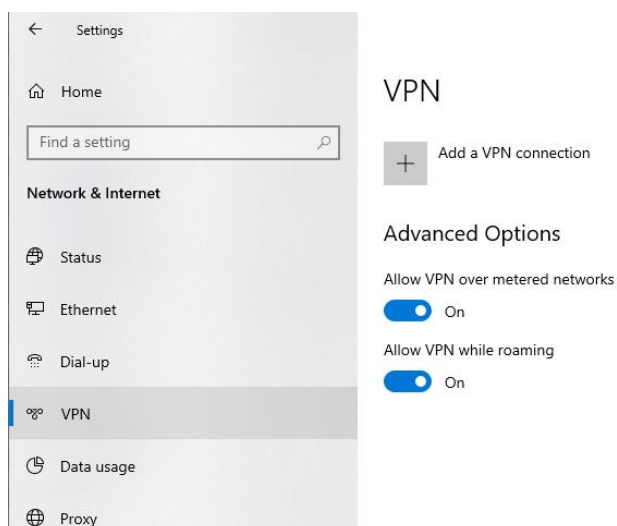

- Ir às definições do Windows.

- Clicar em **“Network & Internet”**.

- Clicar em **“VPN”** e de seguida em **“Add a VPN connection”**.

- Coloque o ip do servidor **193.137.34.100** e um descritivo que ajude a identificar a ligação. Por exemplo **“VPN FLUP”**.

Add a VPN connection

VPN provider
Windows (built-in) ▾

Connection name
vpn flup

Server name or address
193.137.34.100

VPN type
Automatic ▾

Type of sign-in info
User name and password ▾

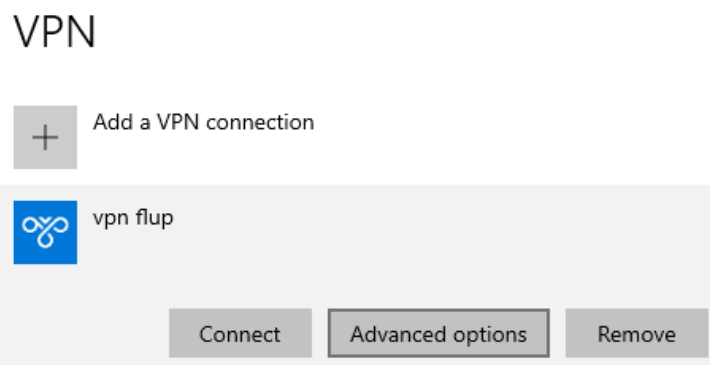

User name (optional)

Password (optional)

Remember my sign-in info

Save Cancel

- Selecionar a ligação criada e clicar em **“Advanced options”**:

- Alterar as definições do proxy de “None” para “Manual Setup”. Adicionar o ip **192.168.1.51** e a porta **8080** e clicar no botão “Apply”:

Connection properties

Connection name	vpn flup
Server name or address	193.137.34.100
Type of sign-in info	User name and password
User name (optional)	
Password (optional)	

VPN proxy settings

These settings will apply only to this VPN connection.

Address	Port
<input type="text" value="192.168.1.51"/>	<input type="text" value="8080"/>

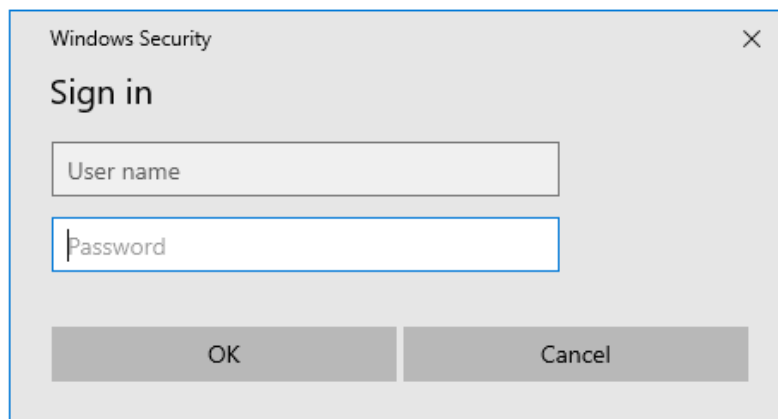

Use the proxy server except for addresses that start with the following entries. Use semicolons (;) to separate entries.

Don't use the proxy server for local (intranet) addresses

- Aplicadas as definições clicar no botão **“Connect”**.

- Inserir o seu email institucional (*****@letras.up.pt) e a senha respetiva:

- Ligação concluída.

- Com a VPN ligada, poderá aparecer um símbolo idêntico a um globo no canto inferior direito do ecrã indicando que a ligação à internet está limitada, o que é normal.
